

„Aftermath of the Covid-19-Pandemic in light of the Global Agenda of Social Work“

Shut downs, lock downs and the reduction to bare necessities are affecting people worldwide. This does not only apply to health and economics, but also to social (distancing) and psychological issues. Social Work must find a way to be influential and successful in midst of this pandemic and lead a

way to recover lost relationships, ties and resources. Building upon the outcomes of the last workshop, this will focus again on the four topics, human rights and social justice, globalization and poverty, working towards environmental sustainability and human relations and social cohesion.

Monday, 20th July
