

DART-SYMPOSIUM

Dortmund Applied Research and Transfer

SCIENCE COMMUNICATION COMMUNICATION IN SCIENCE

26 NOVEMBER 2021

at DASA Working World Exhibition in
Dortmund and online in Mozilla Hubs

Different worlds – and many points of connection

Young researchers from various fields of **applied sciences and arts** are invited to try out new ways of science communication.

At the interface between a live event at a museum and Virtual Reality spaces, participants will experience the potential of **hybrid conferences**.

What skills will scientists need in the future? What role does communication play within academia? And why is it crucial to make one's own findings accessible to the public? Experts will provide impulses, engage in discussions, and then clear

the stage for doctoral students who will show new and innovative ways to present their research.

Posters, videos, artwork, podcasts, performances, VR-installations, prototypes, comics and more.

The call is open. A jury will award a Science Communication **Prize for Young Researchers**.
