

Become a Future Maker

Become a part of
Fachhochschule Dortmund -
University of Applied Sciences
and Arts

With around 15,000 students and 900 employees, our University is one of the ten largest universities of applied sciences in Germany. More than 70 study programs offer Bachelor's and Master's degrees in computer science, engineering, business and social sciences, as well as in architecture and design. An excellent teaching and learning environment are the best basis for making our students Future Makers of tomorrow. Third-party funded research and numerous transfer projects establish direct connections to local companies. At the same time, Fachhochschule Dortmund gives sustainable impetus to the science location and the region.

Research Associate – Edge Computing (Communications)

Faculty of Computer Science
(Salary level: 13 TV-L)

Today, edge computing is one of the most exciting areas in the computer and network industry. Together with leading industry partners project EMULATE will develop an innovative toolset to improve the performance for demanding edge applications (e.g., autonomous driving, augmented reality, drone control).

Your future field of work:

- Developing tools to measure and analyse network performance with edge applications
- Creating new network-related approaches to facilitate new types of services and to optimize the performance of edge applications
- Contributing to the edge emulation and edge diagnostics toolsets
- Identifying your own research areas in alignment with the project objectives and constraints
- Creating scientific publications on edge research for conferences and journals
- Working in an excellent lab environment (e.g. 5G campus network, high-performance server cluster)
- Working in a interdisciplinary, international team of IT, network and application experts

You are passionate about computer science or related subject matter areas with a high affinity to research. You hold a **master degree in information technology or computer science or an adjacent field**. Ideally you have already demonstrated your passion for what you do with some professional experience.

Your qualifications and expertise includes some of the following:

- Solid know-how and experience with network technologies (TCP/IP, Routing, Switching)
- Basic understanding of 5G network technologies
- Basic knowledge of and experience in software development (object oriented languages)

Do these prospects appeal to you? If so, we look forward to receiving your online application quoting the reference number T/04/23/06.

- Good understanding of virtualization-, container- and orchestration technologies
- Willingness to learn about edge computing, system performance optimization, 5G / 6G technologies and applied artificial intelligence
- A good level of written and spoken English is mandatory for this position, German language skills are not required.

For more details about projekt EMULATE refer to: <https://www.fh-dortmund.de/en/projekte/emulate.php>

We are looking forward to applications by an open-minded, inquisitive and committed person with a sense for the essential and thinking outside of the box.

As an employer, Fachhochschule Dortmund...

- **offers** - the advantages of working in public service, in particular employment under the Collective Agreement for Public Service of the Federal States (TV-L).
- **promotes** - the application of the latest scientific findings and the ongoing development through an extensive range of further education and training opportunities.
- **focuses** - on family and health by providing flexible work-/part-time solutions, telework/home office as well as offers by the Family Service and Health Management.
- **provides** - a modern university environment characterized by unique campus locations and good accessibility in the middle of the vibrant Ruhr Metropolis Dortmund.

We encourage applications of qualified persons with severe disabilities and persons with disabilities with equivalent status in accordance with section 2 of the German Social Security Code (SGB) IX. We are also aiming to increase the proportion of women at our university and therefore particularly welcome applications from female candidates. This position is also suitable for part-time employment.
